

# Slingshot DSL + Homeline Installation Guide

## Welcome to your new modem.

We've made it super easy to set up. Just follow the numbered steps below and you'll be good to go.

## What's in the box?

- 1x Modem
- 1x Power cable
- 1x Filter
- 1x Ethernet cable (yellow)
- 2x RJ11 to RJ11 cable (grey)
- 1x RJ11 to BT cable (black)

## Connecting your modem to the internet.

1. Plug the small end of the black cable into the Line port on the filter and the other end into your telephone wall socket
2. Plug one of the grey cables into the Modem port on the filter and the other end into the DSL port on the modem
3. Plug the other grey cable into the Phone port on the filter and plug the other end into your phone
4. Plug the power cable into the modem and your power point and turn the modem on
5. Plug the yellow Ethernet cable into any of the numbered Ethernet ports on the modem and plug the other end into your device (e.g. PC, TV, or game console).

Awesome! Your Internet should now be up and running.

Turn over this guide for Wi-Fi setup instructions.

## Connecting to your Wi-Fi.

Make sure you've completed the steps to connect your modem to the internet on the other side of this guide first.

1. Navigate to the Wi-Fi settings or network finder on your device
2. Select the Wi-Fi network 'Your new Wi-Fi' from the list
3. Enter your Wi-Fi password (refer to the Wi-Fi access card included with your modem).

Your Wi-Fi should now be up and running. Keep reading if you want to personalise your Wi-Fi settings.

### Changing your Wi-Fi settings.

1. Download the My Slingshot app on your mobile or tablet
2. Log in (with your Slingshot account email and password) and find 'My Wi-Fi' in the right-hand menu
3. Enter a new network name and password for your Wi-Fi
4. Press 'Save'.

*Make sure all of your devices use the new network name and password.*

## Changing your Wi-Fi settings.

Make sure you've connected your device to the modem via cable or Wi-Fi before completing these steps.

1. Open an internet browser and type in 192.168.1.1
2. Enter the user name and password:  
Username: admin  
Password: the last six digits of your modem's MAC address (all lower case), which you'll find on the bottom of the modem
3. Select 'Wireless' in the left-hand menu
4. Select '2.4 GHz' in the left-hand menu under 'Wireless'
5. In the field labelled 'SSID', enter your new Wi-Fi name, then click 'Save'
6. Select 'Security' under '2.4GHz' in the left-hand menu
7. In the field labelled 'WPA/WAPI passphrase', enter a new Wi-Fi password and click 'Save'

*Make sure all of your devices use the new network name and password.*
